

Nursing

Undergraduate Nursing Department

Inspired to learn

Nurses are professionals committed to the health and well-being of individuals, families, and communities. Nurses are leaders in the delivery of health care. They ensure that health care services reflect the highest standards of quality and provide affordable, accessible, and efficient patient care.

For more than 45 years, Marian University has offered a respected nursing program. Students achieve success in the classroom, in clinical experiences, and beyond the classroom through their partnership with experienced faculty, clinical agency staff, and fellow students. Graduates are highly regarded by employers for their clinical competence and leadership abilities. The foundation of liberal arts studies and the core values of the University — community, learning, service, social justice, and spiritual traditions — provide the pillars of excellence for the nursing program at Marian.

The baccalaureate degree program in nursing and master's degree program in nursing at Marian University is accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>).

Approval: State of Wisconsin Department of Safety and Professional Services, Board of Nursing

Inspired to lead

Marian student nurses have a broad educational foundation that helps develop a deep understanding of society and health care issues. Students gain experience in competent nursing care practice, learn from health care professionals, and are prepared for an ever-changing health care environment.

Students in Marian's Bachelor of Science in Nursing program experience:

- Professional preparation with a liberal arts foundation.
- Undergraduate practice experiences in our on-campus nursing resource and simulation facility, the Center for Health Professions, beginning in the sophomore year.
- Clinical exposure in a variety of settings.
- Lab-enhanced learning guided by professional nurses.
- Essential knowledge and preparation for the National Council Licensure Examination (NCLEX).

Inspired for success

In a field that the U.S. Bureau of Labor Statistics projects will grow by 19 percent by the year 2022, graduates of the Marian University nursing program not only enjoy a rewarding lifelong career, but are meeting the needs of the growing community. They are competent health care providers that work in a variety of health care settings including, but not limited to:

- Clinics
- Emergency rooms
- Health departments
- Home care
- Hospice programs
- Hospitals
- Long-term care facilities
- Mental health agencies
- Occupational health settings
- Schools
- U.S. military
